The Epson Discproducer PP-100N is the ideal solution if you need to burn and print CD, DVD & DL DVD on a regular basis. It is networkable and specially optimised for working in groups. It can receive up to five jobs at the same time, and will publish them conveniently and reliably. The Epson PP100N is an enclosed system with two recorders and an inbuilt, full colour inkjet printer giving maximum quality and performance.

Besides sharing the high reliability and superb quality of the products in the Epson Discproducer range, the Epson PP-100N also features additional advantages:

More effective workflow - The Epson PP-100N's integrated logic can manage the jobs of several users simultaneously and process them one after the other. That will cut down on waiting time for your employees and take a significant load off your network, since the data doesn't have to be transmitted for each published media.

More concurrent users - Several users can be registered on the Epson PP-100N's "Total Disc Net Administration" Software. The Epson PP-100N can store up to 80 jobs on its internal hard drive. The latest jobs can be retrieved in the form of a template and be reproduced at any time.

Data protection and security - Disable the local CD/DVD burners on local workstations. The Epson PP-100N network publisher lets you control your valuable data and media. A door lock prevents opening the door during operation and ensures safe, secure production. The ergonomic display unit supports eight different languages.

Support - Handisc offer a range of support levels to ensure peace of mind. The Epson Discproducer PP-100N comes with 1 years on-site warranty but this can be upgraded to a 3 year onsite agreement when the system is bought.
